

March 18, 2020

Friends and neighbors – as a matter of law and even more so out of respect for those PCMC/PMC are privileged to serve, PCMC/PMC will not be releasing any information regarding those we may test/treat for COVID-19. The process at this time, as set forth by the Texas Department of State Health Services, and as all health care providers should be practicing, is to involve/notify the State of any/all suspected cases. The State then notifies the local health authority – in Palacios/South Matagorda County’s case we understand that is the Matagorda EOC – who will then inform our community.

PCMC/PMC strongly recommends against engaging in gossip, rumors, etc.; especially on social media, and instead monitoring the local authorities broadcasts and updates at Matagorda County Emergency Operation Center for accurate, timely information about preventive precautions and potential dangers; if any, in our community.

PCMC/PMC is committed to “Caring for Life” for our entire community and will be here for the community; as we have been for 60+ years, as we engage in this journey.

God bless and stay safe.

Robert A. Pascasio, FACHE  
PCMC Administration
